

 **demakatso**  
business profile

# general business activities

The Demakatso Group has been established as a software as a service company in Gauteng, South Africa.

Our traditional business model is based on the accomplishment of assisting business small or large to achieve their day to day activities.

There is a great need with any business to automate processes and take away all the monotonous day to day tasks which is where we come in; we talk through your day to day processes, understand the painful areas and then come up with an automated solution that we then support on an ongoing basis.

## company strategy

### 01 purpose

To be a leader in the SaaS (Software as a Service) space by providing enhanced services, relationship and profitability for businesses.

### 02 vision

To provide quality services that exceeds the expectations of our esteemed customers.

### 03 mission statement

To build long term relationships with our customers and clients and provide exceptional customer services by pursuing business through innovation and advanced technology.

### 04 core values

- we believe in treating our customers with respect and faith
- we grow through creativity, invention and innovation
- we integrate honesty, integrity and business ethics into all aspects of our business functioning.

### 05 goals

- Local, regional and then international expansion in the field of SaaS and develop a strong base of key customers.
- Increase the assets and investments of the company to support the development of services.
- Build good reputation in the SaaS field and become a key player in the software space.

## scope of work

The Demakatso Group conducts business analysis as well as software & application development.

The company undertakes all software maintenance duties for any products developed and conducts all hosting and security for hosted solutions. We also assist in setting up business hardware and installing the necessary software as required by the business. Should there be a need for ongoing support a package is put in place with a service level agreement that is adhered to.

DeMaKatso also provides consulting services in the software engineering space.

## what we do

Our consultants have over 30 years experience combined in the software development space which brings a diverse portfolio of experience with an acute eye for perfection and an incredible passion for delivering tangible results.

We offer the following services:

- Continuous integration
- Unit testing
- Load testing
- Penetration testing
- Development methodologies
- Source control and deployment strategies
- Monitoring
- Disaster recovery strategies

## ownership overview

The company is a firm believer of recruitment and training of ALL individuals regardless of their background. We understand the social imbalances as well as financial difficulties in our society hence we seek to apply some initiatives where possible to address these issues. Our team is under the shareholding of Mr Dean A.T. Kabasa and of Mrs Matshidiso N. Kabasa who are the main custodians with a very good staff backing.

## management overview

**dean kabasa**  
*managing director*

Dean is a seasoned veteran when it comes to software development, project management and system architecture. Through experienced gained from working with large retailers such as the Massmart Group and parastatals such as Eskom, Dean has a lot of experience in developing and deploying large information systems.

Dean is a Microsoft Certified Solutions Developer (MCSD) as well as a Microsoft Certified Professional (MCP) with over 17 years' experience in the Software and Telecoms space. Dean is former Technical Director at RDM Consulting, Senior Software Engineer at InTarget Mobile solutions and also Senior Software Developer at Digitata Limited.

## management overview

**chishamiso nikurawu**  
*managing partner*

Known to most as Slyde, Chishamiso is the glue between back office and the customers. Boasting over 15 years in this space, Chishamiso thrives on building relationships using reliability and credibility as his secret weapons.

Chishamiso has a Diploma in Computing from Melbourne Institute of Business & Technology (Melbourne, Australia), Certificate of C++ Programming from Swinburne University (Melbourne, Australia) and a Bachelor of Business Systems from Monash University (Johannesburg, South Africa).

With all this technical knowledge and having been in customer service and account management for such a long time, there is a great balance when it comes to conveying the technical jargon, the numbers and the deliverables between teams.
